---

I'm a Full-Stack Developer with a strong foundation on ADA compliance, System Design, and CMS(AEM) development. Alongside my extensive experience with front-end frameworks and ADA tools such as NVDA, ColorShark, and Wave I've built a strong understanding for ADA compliance that meets WCGA AAA standards. Along with my proficiency in design, I have experience in building extensive design systems with consistency and scalability in mind. While working as a developer I also have extensive roots in UX design.

## EDUCATION

**University of Central Florida**

B.S. in Computer Science

---
